

April 3, 1973

Marshall the opportunity to go over his work and see where he should be brought up to date and get it in good form.

PRESIDENT: Senator DeCamp.

SENATOR DE CAMP: Mr. President, members of the Legislature, I'm completely in support of the amendment and there's only one question I have. Does this have the emergency clause on it now?

CLERK: Negative.

SENATOR DE CAMP: I'd like to offer an amendment to add the emergency clause, amend the amendment.

CLERK: Why don't you just make a separate amendment?

PRESIDENT: It has to be a separate amendment.

SENATOR DE CAMP: Okay.

PRESIDENT: Back to Senator Lewis and the amendment of the bill. Any further discussion to Senator Lewis' amendment? Senator Lewis, do you care to--excuse me, Senator Savage, did you wish to be heard on the issue?

SENATOR SAVAGE: I just wanted to support this amendment. We have a department in Omaha for elderly school teachers that they tried to close the infirmity part of it because the doors are two inches too short. This would give them a little leeway on making decisions and I support this amendment.

PRESIDENT: Senator Stromer.

SENATOR STROMER: Would Senator Lewis yield to a question, please?

PRESIDENT: Senator Lewis, will you yield?

SENATOR F. LEWIS: Yes.

SENATOR STROMER: Senator Lewis, I think one of the problems if I understand it is the fact that there is change and variety maybe from the rules from year to year, is this correct?

SENATOR F. LEWIS: I think this is substantially true, yes.

SENATOR STROMER: And then I just heard Senator Duis say that what we can do is bring it up to standard now that we would bring the Life Safety Code 101 up to standard because part of it has been changed. Is this going to mean then that we're going to be subdued to more changes than what we have in the past?

SENATOR F. LEWIS: I think I explained earlier that our committee within the Legislature will be able to review these rules. Senator Duis, would you care to respond to that?

PRESIDENT: Senator Duis.

SENATOR DUIS: Yes, I would. Senator Stromer, I don't know whether you're familiar with this or not but the 1967 Life Safety Code is a statute now and if we take that out of the statute it will allow the Fire Marshall to put this rule and regulation as it should be and the rule and regulation at the present time, after it has been approved by the Governor
